Education

Michigan State University East Lansing, MI

B.S. Computer Science *August 2023 – May 2027*

- Relevant Coursework: Object-Oriented Software Development, Data Structures and Algorithms, Database Management and the Cloud, Linear Algebra, Multivariable Calculus

Projects

Spartan Touchdown — 2D Platformer Game Michigan State University

C++ Developer *2025*

- Collaborated with a team to **design, engineer, and develop** a fully playable 2D platformer video game using **C++**, following an iterative software development process.
- Implemented **level loading functionality** through XML file creation and traversal, translating structured data requirements into working system behavior.
- Coordinated with teammates to define requirements, divide implementation tasks, and integrate components while gaining hands-on experience in **team-based software development**.

Social Media Platform Michigan State University

Backend Developer *2026*

- Designed and implemented a full social media platform using **Python** and a **SQL database**, managing the full software development lifecycle from requirements to deployment.
- Authored **SQL queries and table schemas** in **SQL Management Studio** to store and retrieve users, posts, and activity data while directly applying relational database design principles.
- Built backend logic to handle **multiple concurrent data processes**, prioritizing efficient query performance and data integrity.

Photo Gallery Website Michigan State University

Frontend Developer *2025*

- Designed and built a responsive photo gallery web application using **HTML and CSS**, applying front-end development best practices for layout and user experience.
- Leveraged **Visual Studio Code** as the primary development environment, maintaining organized project structure and clean, production-ready code.

Experience
